Full-Stack Developer Intern

🔗 🌐 Remote9 June 2025 – 31 July 2025

InsiderJobs – Job Recruitment Platform | React, Node.js, Express, MongoDB, Tailwind CSS, JWT, Clerk

- Built a recruitment platform where job seekers can search/apply for jobs and companies can post/manage openings.
- Implemented dual authentication (Clerk for users, JWT for companies) with secure role-based access control.
- Developed advanced job search with filters, pagination, rich-text job descriptions, and secure file uploads via Cloudinary.

PROJECTS

NITJ-IT-ResourceBank | Node.js, Express, MongoDB, Handlebars, JWT

🔗 🌐 Dec. 2024 – Present

- Developed a full-stack web application for academic resource management.
- Implemented JWT-based, role-specific authentication (students, faculty, admin).
- Designed RESTful APIs for curriculum, subjects, exam questions, and study materials.
- Integrated Google Drive API for efficient resource storage and collaboration.
- Configured email notifications via Nodemailer for password recovery and updates.
- Established logging and monitoring with Winston.
- Optimized resource delivery for placement preparation (mock interviews, study guides).

Prescripto – Full-Stack Doctor Appointment Platform

🔗 Admin 🌐 🔄 PatientJanuary 2025

React, Node.js, Express, MongoDB, Tailwind, JWT, Cloudinary, Stripe & Razorpay

- Built a production-ready MERN (MongoDB, Express, React, Node) monorepo with separate apps for Patients, Doctors/Admin, and Backend.
- Implemented multi-role JWT authentication (patients, doctors, admin), with role-specific middleware guarding APIs.
- Patient-facing features: browse doctors by specialty, register/login, book/cancel appointments, payment integration (Stripe & Razorpay), and profile management.
- Doctor backend: login, view and manage appointments (complete/cancel), toggle availability, and update profile.
- Admin dashboard: login, add doctors (with image upload via Multer → Cloudinary), view list of doctors & appointments, manage doctor availability, and dashboard metrics.
